Sprott Corporate Class Inc.

ANNUAL MANAGEMENT REPORT OF FUND PERFORMANCE

DECEMBER 31

2017

The annual management report of fund performance is an analysis and explanation that is designed to complement and supplement an investment fund's financial statements. This report contains financial highlights but does not contain the complete annual financial statements of the investment fund. You can get a copy of the annual financial statements at your request, and at no cost, by calling 1-866-299-9906, by visiting our website at www.ninepoint.com or SEDAR at www.sedar.com or by writing to us at: Ninepoint Partners LP, Royal Bank Plaza, South Tower, 200 Bay Street, Suite 2700, P.O. Box 27, Toronto, Ontario M5J 2J1. Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure.

Management Discussion of Fund Performance

Investment Objective and Strategies

The investment objective of the Sprott Enhanced Equity Class (the “Fund”) is to achieve long-term capital growth by investing primarily in Canadian and U.S. equity securities. The Fund provides downside protection through the use of option strategies to the amount of its equity exposure, and is suitable for investors with a long-term horizon.

To achieve the Fund’s investment objective, the Portfolio Advisor employs a value-based investment style which is expected to provide a margin of safety to help manage risk. The Portfolio Advisor will seek to invest in a concentrated portfolio of high quality stocks that it believes are temporarily out of favour in the market.

The Fund may also:

- invest directly in gold bullion as permitted by the Canadian securities administrators;
- invest in foreign securities, provided such investments will not exceed 49% of its assets;
- engage in short selling in a manner which is consistent with the investment objective of the Fund; and
- use derivative instruments, such as options, futures, forward contracts and swaps, for both hedging and non-hedging strategies.

Risk

The risks of investing in the Fund are described in the Fund’s simplified prospectus. The Fund is suitable for those investors seeking long-term capital growth and a core Canadian and U.S. equity fund that seeks to provide some downside protection through the use of option strategies and tactical changes to the amount of equity exposure. The Fund is suitable for investors with a low to medium tolerance for risk and volatility and a long-term investment horizon. There were no significant changes to the investment objective and strategies that affected the Fund’s overall level of risk during the reporting period.

Results of Operations and Recent Developments

The Fund, Series A returned 6.3% in 2017, while its blended benchmark index returned 11.7%.

The expectation and passage of tax reform legislation in the U.S. led to robust performance by U.S. equities in late 2017 as lower tax rates should meaningfully benefit corporate profit growth. In Europe, the election of the moderate candidate Emmanuel Macron in the French presidential election led European equities higher in response to reduced political risk.

The Manager purchased call options on the SPDR S&P 500 ETF ahead of the tax reform legislation, and held companies expected to benefit from tax reform, which contributed to the Fund’s performance as U.S. markets rallied. Similarly, the Fund purchased call options on European equities before the French election, which contributed to performance along with other European exposure.

Individual detractors from the Fund’s performance included SPDR S&P 500 ETF put options and a holding in General Electric Co. The put options, intended to hedge against a U.S. market downturn, detracted from performance as U.S. equities rallied with few sell-offs. General Electric stock declined after management reduced its guidance. The Manager had already reduced the Fund’s position and subsequently sold it completely.

The Manager eliminated the positions in call options on the SPDR S&P 500 ETF and SPDR DJ Euro STOXX 50 ETF late in the year after taking considerable profits.

The Manager added more exposure to the energy and U.S. financials sectors, given that the Manager has a positive outlook on crude oil prices and on the benefits that financials sector companies may experience from tax reform.

The Fund’s net asset value decreased by 33.9% during the period, from \$747.4 million as at December 31, 2016 to \$494.4 million as at December 31, 2017. This change was predominantly due to net redemptions of \$278.5 million. The management expense ratio increased slightly from the prior period.

Ninepoint Partners LP is the manager and portfolio advisor of the Fund. Prior to August 1, 2017, Sprott Asset Management LP was the manager and portfolio advisor of the Fund. Ninepoint Partners LP assumed the portfolio management of the Canadian diversified asset business of Sprott Asset Management LP on August 1, 2017.

Sprott Enhanced Equity Class

December 31, 2017

Related Party Transactions

MANAGEMENT FEES

The Fund pays a management fee to the Manager, at an annual rate of 2.00% for Series A and Series T shares, 1.90% for Series A1 shares, 1.00% for Series F and Series FT shares, 0.90% for Series F1 shares and is negotiated by the shareholders for Series I. The management fee is calculated and accrued daily based on the daily net asset value of the applicable series of the Fund, and is paid monthly. For the year ended December 31, 2017, the Fund incurred management fees of \$10,209,623 (including taxes). The breakdown of the services received in consideration of the management fees, as a percentage of management fees, is as follows:

	Portfolio Advisory	Trailing Commissions
Sprott Enhanced Equity Class – Series A	52%	48%
Sprott Enhanced Equity Class – Series A1	42%	58%
Sprott Enhanced Equity Class – Series F	100%	–
Sprott Enhanced Equity Class – Series F1	100%	–
Sprott Enhanced Equity Class – Series I	100%	–
Sprott Enhanced Equity Class – Series T	58%	42%
Sprott Enhanced Equity Class – Series FT	100%	–

Out of the management fees that the Manager or former manager received from the Fund, the Manager or former manager paid trailer commissions of \$13,281 during the year ended December 31, 2017, to Sprott Private Wealth LP, an affiliate of the former manager.

INCENTIVE FEES

The Fund also pays the Manager an annual incentive fee, equal to a percentage of the average net asset value of the applicable Series of the Fund. Such percentage will be equal to 10% of the difference by which the return in net asset value per share of the applicable Series from launch date to December 31 exceeds the percentage return of the blended benchmark consisting of 50% of the daily return of the S&P/TSX Composite Total Return Index and 50% of the daily return of the S&P 500 Total Return Index for the same period. If the performance of a Series of the Fund in any year is less than the performance of the blended index (the “Deficiency”), then no incentive fee will be payable until the performance of the applicable Series, on a cumulative basis, has exceeded the amount of the Deficiency. For the year ended December 31, 2017, the Fund did not accrue any incentive fees.

OPERATING EXPENSES

The Fund pays its own operating expenses, which include, but are not limited to, audit, legal, custodial, filing and administrative expenses as well as shareholder reporting costs. The Manager pays certain of these expenses on behalf of the Fund and then is reimbursed by the Fund.

OTHER RELATED PARTY TRANSACTIONS

The Fund relied on the approval, positive recommendation or standing instruction from the Fund’s Independent Review Committee with respect to any related party transactions.

1 This information is derived from the Fund's audited annual financial statements.

2 The increase/decrease from operations is based on the weighted average number of shares outstanding over the financial period. Net assets and distributions are based on the actual number of shares outstanding at the relevant time. This table is not intended to be a reconciliation of beginning to ending net assets per share.

3 Distributions were reinvested in additional shares of the Fund or distributed in cash.

4 Information provided is for the period September 30, 2013 (first issuance) to December 31, 2013 for Series T and FT.

1 The information is provided as at December 31 of the years shown.

2 Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.

3 The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. The TER includes dividend expense and securities borrowing expense paid by the Fund in connection with securities sold short.

4 The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor trades its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund.

Past Performance

The indicated rates of return are the historical total returns including changes in share values and assume reinvestment of all distributions in additional shares of the relevant Series of the Fund. These returns do not take into account sales, redemption, distribution or optional charges or income taxes payable by any shareholder that may reduce returns. Please note that past performance is not indicative of future performance. All rates of return are calculated based on the Net Asset Value of the particular Series of the Fund.

Year-by-Year Returns

The following chart indicates the performance of each Series of the Fund for the previous twelve-month periods ended December 31 shown, unless otherwise noted. The chart shows, in percentage terms, how much an investment made on the first day of each period would have grown or decreased by the last day of each period.

* Return from the period April 16, 2012 (launch date) for Series A1 and F1, April 17, 2012 for Series A, April 18, 2012 for Series I, and May 24, 2012 for Series F, to December 31, 2012 (not annualized).

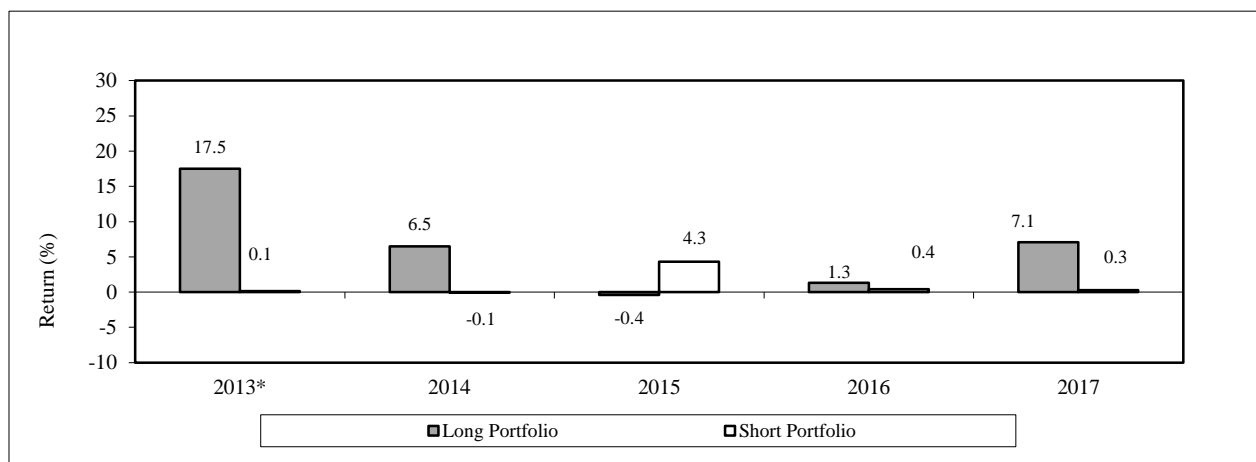

** Return from the period September 30, 2013 for Series T and FT, to December 31, 2013 (not annualized).

Sprott Enhanced Equity Class

December 31, 2017

Long and Short Portfolio Returns

The following table illustrates the contribution to the return of the Fund by the long portfolio and the short portfolio of the Fund (before the impact of Fund expenses) for the previous twelve-month periods ended December 31 shown, unless otherwise noted. For the purposes of this disclosure, certain derivatives may be considered to be part of the short portfolio.

* The Fund did not hold short portfolio positions prior to 2013.

Annual Compound Returns

The following table illustrates the annual compound total return for each Series of shares of the Fund for the periods shown. As a basis of performance comparison, the annual compound return of the Fund is compared to that of a blended index consisting of 50% of the daily return of the S&P/TSX Composite Total Return Index and 50% of the daily return of the S&P 500 Total Return Index (the “Blended Index”). The S&P/TSX Composite Total Return Index is a capitalization-weighted index that represents some of the largest float-adjusted stocks on the Toronto Stock Exchange, and the S&P 500 Total Return Index is an index of 500 stocks actively traded in the United States chosen for market size, liquidity and industry grouping, among other factors. Since the Fund does not necessarily invest in the same securities or in the same proportion as the Blended Index, the performance of the Fund is not expected to equal the performance of the Blended Index.

	1-Year	3-Year	5-Year	Since Inception*
Sprott Enhanced Equity Class – Series A	6.3%	2.6%	5.5%	5.4%
