**Before you invest in any fund, consider how the fund would work with your other investments and your tolerance for risk.**

Subject to securityholder approval, Ninepoint Partners LP proposes to change the investment objective of the Fund effective on or about August 7, 2020 to permit the Fund to obtain leveraged exposure to the performance of the S&P 500 Index, or a successor or replacement index and through the use of option strategies seek to offer investors higher returns than the Index, but with similar volatility. The Fund may use derivatives, borrow cash and sell securities short. The maximum aggregate exposure to short selling, cash borrowing and derivatives used for leverage will not exceed 300% of the Fund’s net asset value, calculated on a daily basis. In conjunction with the proposed investment objective change, once approved and implemented, the Fund is expected to change its name to Ninepoint Return Advantaged U.S. Equity Index Class, convert from a traditional mutual fund to an “alternative mutual fund” and change from a U.S. dollar-denominated fund to a Canadian dollar-denominated fund. The risk rating of the Fund is also expected to change from Low to Medium to Medium.

On February 18, 2020, the management fee of Series D of the Fund was reduced from 1.50% to 1.30%.

#### HOW RISKY IS IT?

The value of the Fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund’s returns change over time. This is called “volatility.”

#### RISK RATING

Ninepoint Partners LP has rated the volatility of this Fund as **low to medium**.

This rating is based on how much the Fund’s returns have changed from year to year. It doesn’t tell you how volatile the Fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

For more information about the risk rating and specific risks that can affect the Fund's returns, see "What Are the Risks of Investing in the Fund?" section of the Fund's simplified prospectus.
