

# Ninepoint FX Strategy Fund

*A unique liquid alt* THAT ADDS TRUE DIVERSIFICATION

# Ninepoint FX Strategy Fund

## Trading on Global Macroeconomic and Financial Trends

The **Ninepoint FX Strategy Fund** uses a systematic, quantitative, factor-based approach that combines new and historical data to predict future global currency movements, invests on a long/short basis, and offers:

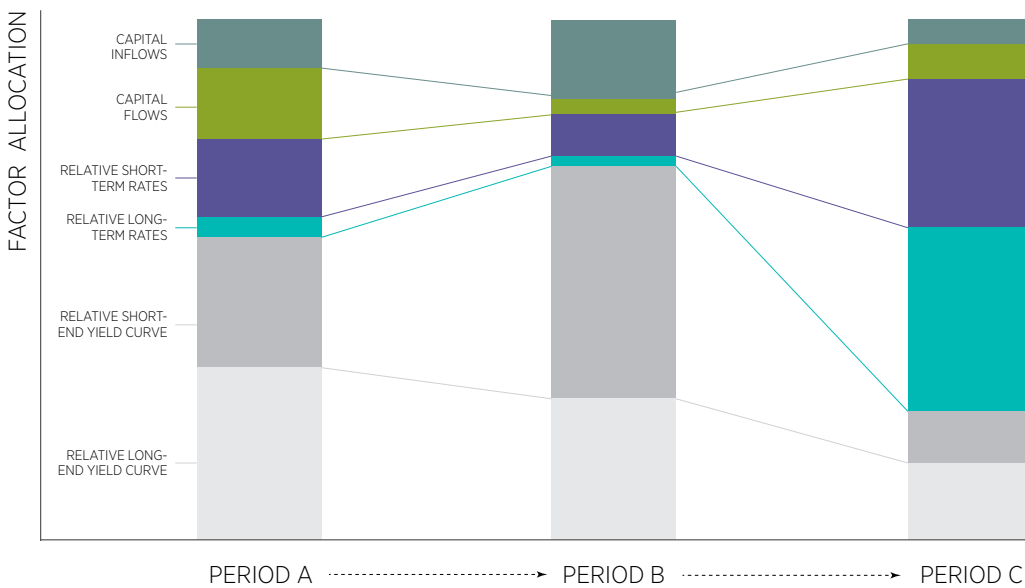

- **True Diversification:** Equity-like returns with expected low correlation to public markets;
- **Adaptive Strategy:** Actual daily returns are compared with forecast to determine the factor weightings for the next trading day;
- **Liquid Alternative Structure:** Combines the diversification effect of alternative investing with the freedom of daily liquidity. Available to accredited and non-accredited investors, and;

## 7 Target Factors

Supported by extensive research, explainable economic rationale, and proven economic principles, the Fund manager isolates 7 distinct factors which it analyzes to uncover opportunities across 15 different currencies, plus gold:

Influencing Factors:	Capital inflows	Economic surprise	Inflation index	Relative long-term rates	Relative short-term rates	Relative long end yield curve	Relative short end yield curve
<b>Description</b>	Movement of money flows between currencies	Difference between economic releases and consensus market expectations	Overall direction of commodity prices	10 year bond yield	One month risk free rate	Difference between one year bond yield and 10 year bond yield	Difference between one month risk free rate and the one year bond yield

In response to market conditions, the weights of the factors used in the quantitative model change over time, giving more weight to the proven, relevant ideas:

Using a statistical, model-based approach that combines new and historical data, global currency futures are traded long and short in the Fund to both capitalize on and defend against economic, financial, and political market conditions.

## CURRENCIES TRADED BASED ON THE SEVEN FACTORS:

### A Liquid Alternative Fund Structure

- Access to an institutional-caliber investment strategy,
- Asset class that may provide low long-term correlation to equities and bonds, and
- Provides daily liquidity.

### The Liquidity of Forex

#### The foreign exchange market is the largest in the world.

The Ninepoint FX Strategy Fund uses foreign exchange as the most efficient way to trade on global trends. The robust size and liquidity of the forex market ensures that it can easily handle large increases in trading volume without experiencing significant changes in price. Equity markets, in contrast, tend to be more vulnerable to price volatility caused by sharp changes in trading volume.

## WHY CURRENCY FUTURES?

### CURRENCY FUTURES:

- Are even more liquid than trading the underlying currencies.
- Are traded through extended sessions improving manager flexibility.
- Only require USD collateral which makes it easier to fund trades.

## P/E GLOBAL LLC

### INSTITUTIONAL EXPERIENCE

- The Fund's sub-advisor, P/E Global LLC, is a Boston-based quantitative manager, founded in 1995 by Warren Naphtal, J. Richard Zecher and Mary Stephens Naphtal.
- Approximately USD 15 billion in assets under management.
- Investment team comprised of quantitative finance professionals, data scientists, economists and statisticians.
- Investors include some of the largest and most sophisticated global institutional investors.

## WHY FOREIGN EXCHANGE IS SO LIQUID

# \$6T

OVER \$6 TRILLION  
TRADED DAILY

# 88%

88% OF FOREX TRADES HAVE  
THE USD ON ONE SIDE  
OF THE TRADE

# 25x

FX TRADING VOLUME IS OVER  
25X GREATER THAN EQUITIES
