INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE

JUNE 30

2023

The interim management report of fund performance is an analysis and explanation that is designed to complement and supplement an investment fund's financial statements. This report contains financial highlights but does not contain the complete interim financial statements of the investment fund. You can get a copy of the interim financial statements at your request, and at no cost, by calling 1-888-362-7172, by visiting our website at www.ninepoint.com or SEDAR at www.sedar.com or by writing to us at: Ninepoint Partners LP, Royal Bank Plaza, South Tower, 200 Bay Street, Suite 2700, P.O. Box 27, Toronto, Ontario M5J 2J1. Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure.

Management Discussion of Fund Performance

Investment Objective and Strategies

The objective of Ninepoint Resource Fund Class (the “Fund”) is to seek to achieve long-term capital growth. The Fund invests primarily in equity and equity-related securities of companies in Canada and around the world that are involved directly or indirectly in the natural resource sector. To achieve the Fund’s investment objective, the sub-advisor uses macro-economic research to identify the most attractive resource sub-sectors to invest in. The sub-advisor employs an opportunistic investment approach by being able to invest across the global resource universe (oil & gas, coal, uranium, renewable energy, base metals, precious metals, agriculture, forestry, water, commodity infrastructure and service companies). The Fund may also invest in gold and/or silver in the form of bullion, coins and storage receipts and certificates relating to such metals when deemed appropriate by the sub-advisor.

As part of its investment strategy, the Fund may:

- engage in short selling in a manner that is consistent with the Fund’s investment objectives and as permitted by the securities regulations
- hold cash, overweight cash equivalents and fixed income securities based on the market outlook for the resource sector;
- use derivative instruments, such as options, futures, forward contracts and swaps, for both hedging and non-hedging strategies;
- invest in Commodity exchange-traded funds (ETFs) and in aggregate, up to 10% of its net assets in underlying ETFs as measured at the time of investment; and
- engage in securities lending, repurchase and reverse repurchase transactions as permitted by securities regulations.

Sprott Asset Management LP is the sub-advisor of the Fund.

Risks

The risks of investing in the Fund are described in the Fund’s simplified prospectus. This Fund is suitable for those investors seeking long-term capital growth. This Fund is suitable for investors with a high tolerance for risk and a long-term investment horizon.

Results of Operations and Recent Developments

The Fund, Series A returned -2.4% in the first half of 2023, while its blended benchmark, 50% S&P/TSX Capped Energy Total Return Index and 50% S&P/TSX Capped Materials Total Return Index, returned -1.6%

Most of the commodities impacting resource portfolios sold off in the first half of 2023. Copper, nickel, zinc and crude oil were all down, having returned -1%, -33%, -19% and -11%, respectively. The Bloomberg Commodity Index, which is comprised of a broad basket of commodities, fell 10% during the first half of 2023 to levels last seen in January 2022. Gold bullion was one of the exceptions, having climbed 5% in the first half as the Federal Reserve became moderately less hawkish. An increasing Federal Funds Rate, a global economy flirting with recession, Europe’s industrial slump and China’s sputtering post Covid recovery were the major themes impacting resource equities.

The Fund’s performance suffered because of the general decline in resource-based equities. In terms of individual securities, Collective Mining Limited and Uranium Energy Corporation were the top contributors. Collective Mining Limited continued to expand on a gold discovery while Uranium Energy Corporation appreciated alongside other uranium equities. The top individual detractors from performance were Quebec Nickel Corporation and Canada Nickel Company Inc. Both stocks sold off as nickel prices declined 33% in the first half of the year.

The Fund’s net asset value increased by 427.1% during the period, from \$4.3 million as at December 31, 2022 to \$22.8 million as at June 30, 2023. This change was predominantly due to net subscriptions of \$23.0 million, and net realized and unrealized losses on investments of \$1.4 million.

Recent Developments

There were no material changes to the investment strategy, portfolio composition and features of the Fund during the period. The Manager actively monitors the positioning of the Fund’s portfolio for changes in current market conditions and the economic environment.

Related Party Transactions

MANAGEMENT FEES

The Fund pays a management fee to the Manager at an annual rate of 2.50% for Series A units, 1.50% for Series D and Series F, and as negotiated by the unitholders for Series I. The management fee is calculated and accrued daily and is paid monthly based on the daily net asset value of that series of the Fund. For the period ended June 30, 2023, the Fund incurred management fees (including taxes) of \$302,002. The breakdown of the services received in consideration of the management fees, as a percentage of management fees, is as follows:

	Portfolio Advisory	Trailing Commissions
Ninepoint Resource Fund Class – Series A	60%	40%
Ninepoint Resource Fund Class – Series D	100%	–
Ninepoint Resource Fund Class – Series F	100%	–

Out of the management fees that the Manager received from the Fund, the Manager paid trailer commissions of \$637 during the period ended June 30, 2023, to Sightline Wealth Management, an affiliate of the manager.

INCENTIVE FEES

The Fund pays the Manager an annual incentive fee, subject to applicable taxes including HST, equal to a percentage of the daily net asset value of the applicable series of the Fund. The percentage will be equal to 10% of the difference by which the return in the net asset value per security of the applicable series of the Fund from January 1 to December 31 exceeds the percentage return 50% of the daily return of the S&P/TSX Capped Materials Total Return Index and 50% of the daily return of the S&P/TSX Capped Energy Total Return Index (the "Index") of the applicable index (or any successor index to such index) for the same period. If the performance of a series of the Fund in any year is less than the performance of Index (or any successor indices to such indices) (the "Return Deficiency"), then no incentive fee will be payable in any subsequent year until the performance of the applicable series, on a cumulative basis calculated from the first of such subsequent years, has exceeded the amount of the Return Deficiency. The Manager may reduce the incentive fee payable by the Fund with respect to a particular investor. Investors who are entitled to the benefit of a lower incentive fee may receive an incentive fee rebate from the Manager. Investors in Series I securities may negotiate a different incentive fee than the one described in this table or no incentive fee at all. For the period ended June 30, 2023, the Fund did not accrue any incentive fees.

OPERATING EXPENSES

The Fund pays its own operating expenses, which include, but are not limited to, audit, legal, custodial, filing and administrative expenses as well as shareholder reporting costs. The Manager pays certain of these expenses on behalf of the Fund and then is reimbursed by the Fund. At its sole discretion, the Manager may waive or absorb a portion of the operating expenses of the Fund. Amounts waived or absorbed by the Manager are reported in the Statements of Comprehensive Income. Waivers or absorptions can be terminated at any time without notice. For the period ended June 30, 2023, the Manager did not absorb any expenses.

OTHER RELATED PARTY TRANSACTIONS

The Fund relied on the approval, positive recommendation or standing instruction from the Fund's Independent Review Committee with respect to any related party transactions.

1 This information is derived from the Fund's interim and audited financial statements.

2 The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period. Net asset and distributions are based on the actual number of units outstanding at the relevant time. This table is not intended to be a reconciliation of the beginning to ending net assets per unit.

3 Distributions were reinvested in additional units of the Fund.

4 Information provided is for the period from February 7, 2022 (first issuance) for Series A, Series D and Series F, to December 31, 2022.

Net asset value per Unit ^{1,5}	\$6.36	\$7.24

1 Information provided is as at June 30, 2023 and December 31 for the years shown prior to 2023.

2 Management expense ratio ("MER") is based on total expenses (including incentive fees, if any; excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. The Manager may waive or absorb a portion of the operating expenses of the Fund. Waivers and absorption can be terminated at any time.

3 The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. The TER includes dividend expense and securities borrowing expense paid by the Fund in connection with securities sold short.

4 The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser trades its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of the Fund.

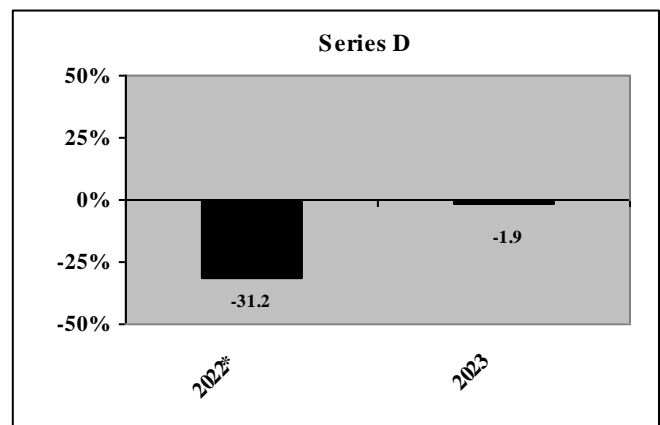

5 Transactional net asset value per share for series A is \$6.17, Series D is \$6.27 and Series F is \$6.26.

Past Performance

The indicated rates of return are the historical total returns including changes in unit values and assume reinvestment of all distributions in additional units of the relevant Series of the Fund. These returns do not take into account sales, redemption, distribution or optional charges or income taxes payable by any unitholder that may reduce returns. Please note that past performance is not indicative of future performance. All rates of returns are calculated based on the Net Asset Value of the particular Series of the Fund.

Year-by-Year Returns

The following charts indicates the performance of each Series of the Fund for the period ended June 30, 2023 and for the period since initial issuance to December 31, 2022. The chart shows, in percentage terms, how much an investment made on the first day of each period would have grown or decreased by the last day of each period. Returns are not shown for a Series in any period in which there were zero outstanding units as at the end of the period.

* Return from February 7, 2022 (first issuance) for Series A, Series D and Series F, to December 31, 2022 (not annualized).
